Subdivision Approval No. SA20122009860 Construction Approval No. N/A

- I understand that my well will be located closer than the recommended extent of a protective well radius to my property line. (75' for up to 750 GPD if a dug/shallow or drilled well.)
- I understand that current state law does not protect my well beyond the boundary of my property and that the rules of the Department of Environmental Services allow a leachfield to be installed as close as 10 feet to the property line which may result in a leachfield on abutting property being installed closer than 75 feet to my well.
- I understand that I cannot prevent a leachfield from being installed on abutting property within 10 feet of the property boundary solely on the basis of my well location.
- I understand that with proper well construction, including drilling the well into bedrock, casing the well and sealing the casing, the risk of contamination from any leachfield closer than 75 feet to my well can be minimized.
- I understand that I have no cause of action against the State of New Hampshire or any owner of the abutting property if my well becomes contaminated as a result of the decreased setback distance.
